GMT anabolics e book  
edition pdf - Anabolism  
(from Greek: ἀνά, "upward"  
and  
βάλλω, "to throw",  
also called biosynthesis) is  
the set of metabolic  
pathways that construct  
molecules from smaller  
units. These reactions  
require energy, known also  
as an endergonic process.  
Metabolic processes are  
either "anabolic" or  
"catabolic". Anabolism -  
Wikipedia - Most steroid  
users are not athletes. In the  
United States, between 1  
million and 3 million  
people (1% of the  
population) are thought to  
have used AAS. Studies in  
the United States have  
shown that AAS users tend  
to be mostly middle-class  
heterosexual men with a  
median age of about 25  
who are noncompetitive  
bodybuilders and  
non-athletes and use ...
